

# PRODUCT INSTRUCTION WORKSHEET

**Skill-It:** Destroys all types of algae including difficult black algae quick and effectively! Just 5-6 oz treats 10,000 gallons and it will also keep bees and wasps away. No heavy metals.

**400 Dry:** Active ingredient 99% Sodium Bromide. Works like Yellow Out® or other like products, must follow with shock to activate. It also can be used to remove brown stains from salt left on the floor of the pool. Can be used with Bromine or Chlorine.

*\*Yellow Out is a registered trademark of Coral Chemical Company Corporation.*

**Aqua Pure:** Use this product to open the pool in the spring and be algae free all season. (maintaining proper chlorine levels) Excellent algacide, triple chleated, dual copper-quat formula. Turn even the worst yellow or green pool to sparkling blue overnight.

*Never use copper algacides on newly plastered pools. Not recommended for regular maintenance or for use as a bluing agent.*

**Clarex 500:** A professional favorite! Clear cloudy water fast, economically & naturally. Non-toxic. Will not clog filters and no mess to vacuum up. 1 quart treats 224,000 gallons of water. Good to use after algae removal and Phosphate removal treatments.

**Oil-Out:** 100% Natural Enzyme concentrate. Water & filter cleaner, 1 oz treats 20,000 gallons. Pour into skimmer or directly into pool, starts working immediately. Can use a sprayer for tile cleaning applications.

**Protect All Supreme:** 1 qt. treats 20,000 gallons. 1 qt at start up. Removes and controls stains, scale, and calcium, iron, rust and corrosion problems. For maintenance use 3-4 oz a week. To remove calcium from tile raise the water level and add 1 qt per 20,000 gallons. Leave running for at least 2-3 days or until calcium is gone. For metal stains in pool wall use this product with Stain off. May lower chlorine level temporarily, so you may want to put some tablets in skimmer while treating. Can be used with all pool surfaces, add directly to pool.

**Salt Protect:** 1 qt. = 20,000 gallons, 1 qt at start up and 1 qt on 28th day when salt is added. Protects against

stain, scale, iron, corrosion and rust problems. For calcium on tile, raise the water level; add 1 qt per 20,000 gallons and leave running for at least 2-3 days or until calcium is gone. For metal stains in pool wall use this product with Stain off. Can be used with all pool surfaces, add directly to pool. May temporarily lower chlorine levels, so may want to put some tablets in skimmer while treating.

**Stain Off:** 1 qt. treats 10,000 gallons. Excellent at removing metal stains from the walls of the pool. Use this product along with Protect all or Salt Protect, the Stain Off pulls the metal out of the wall of the pool the Protect all or Salt Protect will tie it up and remove it. If you have copper stains, when you add stain off to the water it will turn very blue as it is pulling the copper out of the walls, this can take some time to filter it out. If you are sure the stains are out of the walls, you can add some Clarex 500 to help it filter out.

**300 Tile Cleaner:** Very strong, removes calcium build up on tile. Do not leave on longer than 5 minutes, work in small areas at a time, do not let it run. Calcium and salt look very similar identify it first. Calcium is very white and chalky; salt is opaque in color, sort of milky and would only show up on pools with a salt system. To remove salt deposits from tile, use 300 with Plaster white and bright, it will turn white and start foaming, work in small areas at a time, do not leave on longer than 5 minutes, and do not let it run. For rust or iron stains on decks use the two together as described here. Always rinse well after each application.

**Plaster White'N Bright:** When draining & acid washing a pool, add 6 oz per batch of acid & water, no more fumes, will coat evenly, will not let the acid etch the surface of the pool, is not harmful to plant life. If you would prefer not using acid you can use Stain Off in its place, 12oz or more per batch. Can also be used with 300 to remove salt deposits on tile and rust stains on decks as described above. Plaster white'N Bright used alone will remove salt deposits on decks.

## PRODUCT INSTRUCTION WORKSHEET

**TPS:** Excellent sealer. Can use on any and all surfaces. If you use it on a surface that was shiny & lost its shine it will restore it. On surface that are not shiny or glazed it will not be shiny, it will however have a wet look. Will not yellow, will not turn white and flake, can be expected to last about a year.

**M2000 Filter Cleaner:** The original back-wash type filter cleaner. Fast acting, effective, and economical. Use only 10 oz when backwashing. Expect exceptional results when soaking cartridge filters.

**ZEO Filter Cleaner:** Will completely clean and refresh all types of ZEO Filter Media. Removes scale, Oil and minerals. An easy to use liquid formula. Does not contain phosphates.

**Cartridge Cleaner:** Quick Spray formula for easy an easy and quick clean. Hose cartridges down then use this spray and rinse. For extremely dirty cartridges, this product can also be used as a soak. Dilute in 10 gallons of water in large container and soak overnight for a "like new" clean.

**Sunshine Sparkle Bright:** Excellent, natural and economical pool water clarifier. One quart treats 80,000 gallons.

**Commercial Strength Deck Cleaner:** A unique formula for cleaning a variety of hard deck surfaces safely. Fast and economical!

**Quick 'n Thick Tile Cleaner:** Designed for the service technicians' weekly tile cleaning. Thick, stays on brush. An excellent cleaner.

**Attack Shock with Oxy Crystals:** It's the 13% minimum oxygen content that makes this a powerful non-chlorine oxidizer. One pound treats 25,000 gallons of water. User friendly, non-toxic, and hypo-allergenic.

**Chlor-Ex Chlorine Remover:** Effectively and quickly removes excess chlorine.

**Alum:** Flocculent for cleaning cloudy water. Also good for removing high metal content from pool water.

**Spa Foam Stop:** Concentrated. Eliminates foam instantly. User friendly, environmentally safe, non-toxic, non-carcinogenic, hypo allergenic, non-corrosive and non-flammable.

**Spa Stain-Off:** A spa size for easy application in spas, hot tubs, and fountains, wherever staining is a problem. Economical and fast acting.

**Spa Super Sparkle:** Spa size super clarifier. Concentrated and easy to use. User friendly and environmentally friendly, bio-degradable, non-toxic, hypo allergenic. Won't clog filters. Will quickly create brilliantly clear spa water.

**Super Spa Protect:** The spa size of Protect-All Supreme. Will remove, control and prevent metal stains in spas.

**Deck-Protect:** Important product for sealing deck surfaces. Designed to protect hard surface decks from stains and makes them easier to clean. Reduces cracking, flaking, and chipping of deck surfaces. Requires only minutes to apply. Reapply just once a season.

**Phosphate Remover:** Prevent algae! Increases the efficiency of salt water generators. Just one quart removes 1,000 ppb of Ortho Phosphates per 20,000 gallons. Non-Toxic. Phosphate removal can cause cloudy water. Use Clearex 500 Clarifier during this process.

**Phosphate Remover Plus:** Great for commercial pools or excessive phosphate loads. Removes 6,000 ppb per 10,000 gallons. All phosphate removers available in gallons.
