## CLEAREX 500

### POOL & SPA BRIGHT 'N CLEAN WATER CLARIFIER

One quart treats over 220,000 gallons of pool water. Just 1 ounce treats 7,000 gallons!

- *Clearex 500 is the original fast acting concentrated pool water clarifier.*
- *As always - user friendly, safe, non-toxic, non-corrosive, non-flammable, non-carcinogenic, and hypo-allergenic.*
- *Unaffected by chlorine.*
- *Effective at all pH values.*
- *Will not clog filters.*

### CLEAREX 500 CONCENTRATE

CLEAREX 500 may be applied whenever turbidity (cloudy) problems occur and can be used as a replacement for alum. Usually one treatment is sufficient to produce outstanding clarity and brilliance to pool water; however in waters containing unusually high solids and excess turbidity causing impurities, a second treatment may be desirable.

CLEAREX 500 may be of particular interest to commercial pools experiencing turbidity problems; especially where high bathing loads are normal and very hot and dry climate conditions prevail.

CLEAREX 500 is unaffected by chlorine and is effective at all pH values and with all pool filtration systems. CLEAREX 500 may be applied as often as necessary to maintain clarity. Each graduation on side of bottle represents approximately 2 ounces.

*Unlike other clarifiers, Clearex 500 requires no vacuuming after use. Particles are filtered out for a "no mess" treatment.*

#### INITIAL TREATMENT DIRECTIONS FOR SWIMMING POOLS

1. Turbid (cloudy) water - add 3 oz. CLEAREX 500 per 21,000 gallons of pool water by pouring slowly through skimmer when filter system is operating. If necessary, repeat treatment after 24 hours. Usually water clears & sparkles after the first treatment.

2. To maintain pool water clarity and brilliance, add 1 oz. of CLEAREX 500 per 7,000 gallons of water weekly. Swimming may be continued immediately after treatment. CLEAREX 500 may be used as often as necessary without any adverse reaction.

#### INITIAL TREATMENT DIRECTIONS FOR SPAS AND HOT TUBS

1. Turn on pump to generate water turbulence and add 1 oz. of CLEAREX 500 per 800 gallons of pool water.

2. Allow system to operate for about 3 minutes to insure thorough mixing of CLEAREX 500 with pool water.

3. Usually the pool water will clear promptly. Repeat treatment after 24 hours if necessary.

4. Add CLEAREX 500 weekly - 1 oz. per 800 gallons of pool water.

#### KEEP OUT OF REACH OF CHILDREN

Go from cloudy to crystal clear fast, and in an environmentally friendly way! Just pour 2 oz. (per 14,000 gallons pool water) in the skimmer while the filter is running!
